Live prototype

## PROFESSIONAL SUMMARY

Qualified lawyer (LLM, Distinction) and software engineer who turns ideas into working AI and automation solutions. I take ideas from concept to working prototype using Python, JavaScript, LLM APIs, Power Platform and AI coding assistants, then test and refine them with users until they genuinely help. I built a Power Apps flexi time app used by over 5,000 BT agents, led the build of a document automation platform for international trade at United Sea, and recently built an NDA Review Assistant that reviews contracts against a playbook. My published research on AI and automation in law firms gives me a practical understanding of how legal teams work and where large language models add value, as well as their limitations.

## KEY SKILLS

- AI & Automation Prototyping
- Power Platform (Power Apps, Copilot Studio)
- AI Coding Assistants (Claude, Copilot)
- Document Automation & Legal Tech (Bryter)
- Process Analysis & Solution Design
- Stakeholder Engagement with Lawyers & Teams
- LLM APIs & Prompt Engineering
- Python, JavaScript, TypeScript, APIs
- Microsoft 365 & SharePoint Integration
- User Research & User Experience Design
- Build vs Buy & Technology Assessment
- Demos, Documentation & IT Handover

## SELECTED PROJECTS

- **NDA Review Assistant (2026):** Built a legal AI prototype in Python, Streamlit and an LLM API that reviews uploaded NDAs against a firm playbook, flags High, Medium and Low risk clauses, quotes the clause, suggests fallback wording, supports Q&A on the document and exports results. Designed with a lawyer-in-the-loop disclaimer to manage LLM limitations. Live at nda-review-assistant.streamlit.app.
- **EE TV Assist (BT):** Identified a pain point in long TV diagnostic calls and built a remote support tool letting agents view and control a customer's TV box live. Recognised by the Head of Marketing and placed on the roadmap for the wider organisation.
- **Agentic AI Workflow:** Built an automated agentic AI workflow for trading, using LLMs to carry out multi-step tasks with minimal manual input.

## PROFESSIONAL EXPERIENCE

**UNITED SEA**, London, UK **Oct 2025 – Present**

***Lead Software Engineer / Legal Technology Lead***

- Led the build of a document automation platform for international trade, automating bills of lading, certificates of origin and commercial invoices with React, Next.js, Node.js and TypeScript.
- Worked with the ICC, DCSA and GLEIF to translate legal and regulatory requirements into practical document workflows that non-technical stakeholders could review and approve.
- Administered the Microsoft 365 tenant and deployed cloud infrastructure on Azure, including initial Copilot Studio set up alongside the platform back end.
- Coached team members on new technologies through one-to-one sessions, and documented and demonstrated solutions for handover.
- Managed budgets and delivery across concurrent workstreams in Jira and Linear, using AI coding assistants to prototype and test quickly.

**BT GROUP**, Doncaster, UK **Jan 2024 – Present**

***Functional Operation Admin*** *Apr 2025 – Present*

- Built a Power Apps flexi time app used by over 5,000 contact centre agents to bank flex-in hours and book flex-out time, replacing manual requests to team leaders with simple self-service.
- Analyse how operational teams work across three centres and identify process changes, including automations that removed repetitive reporting work for managers.
- Produce shrinkage analysis that informs resourcing and FTE decisions, presenting insights clearly to managers using Power BI, Excel and Microsoft Copilot.

***Network Operation Specialist***

- Analysed incident trends across BT and EE services, carrying out root cause analysis and recommending improvements.

***Senior Tech Support*** *Nov 2024 – Apr 2025*

- Mapped the user journey for EE TV diagnostics, then designed and pitched EE TV Assist to managers, positioning it alongside existing tools.
- Corrected dead-end flows in BT's Albert Knowledge diagnostic journeys, improving resolution accuracy, recognised at organisational level.

***Sales Advisor*** *Jan 2024 – Nov 2024*

- Handled high volumes of customer contacts, building first-hand insight into user needs and pain points.

**BANK.GREEN**, USA (Remote) **Mar 2023 – Dec 2023**

***Backend Engineer***

- Built and documented APIs and optimised database architecture, collaborating with distributed teams using GitHub, Slack and Jira.

**NIMASA**, F.C.T Abuja, Nigeria **Mar 2021 – Dec 2022**

***Export Sales Administrator***

- Managed trade documentation workflows and supported digitalisation of paper-based processes, improving data accuracy and audit readiness.

## PUBLICATIONS

- "Use of Automation and AI in Law Firms: A Means to Increase Internal Efficiencies and Enhance Client Experience", academia.edu

## EDUCATION

**LLM International Business Law (Distinction)**, University of Law, London 2024
**Council of Legal Education (Summa Cum Laude)**, Law School, Abuja 2020 – 2021
**Bachelor of Laws and Finance (Second Class Upper Honours)**, Ahmadu Bello University 2015 – 2019

## CERTIFICATIONS & TRAINING

- Legal Tech and Innovation, University of Law
- Bryter Building Bar, Legal Tech Programme with Trowers & Hamlins (2023)
- Processing Documents with Python Using Document AI API, Google Cloud (2023)
- Digital Trade Strategist, International Chamber of Commerce (2025)
- Google Analytics Certification; Lean Six Sigma (Practitioner)
- Member of the Nigerian Bar Association

## ADDITIONAL INFORMATION

**Tools:** Power Apps, Copilot Studio, Microsoft Copilot, Claude, LLM APIs, Python, Streamlit, Django, JavaScript, TypeScript, React, Next.js, Node.js, SharePoint, Microsoft 365, Azure, Bryter, Jira, Confluence, GitHub

**Languages:** English (Fluent), Arabic (Conversational)
